KEMBLA COPPER TUBE

25 YEAR WARRANTY

To Whom it May Concern,

MM Kembla was established in 1916 at Port Kembla, Australia, and it was from this location that the famous "KEMBLA" brand name originated. MM Kembla is Australia's only copper tube manufacturer, and the most highly regarded supplier of copper tube, fittings and accessories.

As one of Australia's leading companies, MM Kembla provides an extensive range of infrastructure products serving markets in the building, construction, energy, transport and original equipment manufacturers.

MM Kembla has a quality management system and holds Licence No. 0002 to AS/NZS ISO 9001:2008, and also holds StandardsMark Licences under various Australian, British/European and American Standard product ranges.

KEMBLA[®] copper tube has been installed on many of the world's most prestigious projects for over 80 years, and as such carries a 25 Year Warranty against manufacturing defects as identified in our terms and conditions located on our website.

If any installation using Kembla[®] copper tube becomes defective or fails and MM Kembla is notified of the details, and MM Kembla is satisfied that the defect or failure was a result of a manufacturing defect and not the result of faulty specification, installation, system design or incompatible environment, MM Kembla will submit a refund or exchange the defective goods with new products in accordance with the provisions set out in our terms and conditions.

Please see our website at www.kembla.com.au for any further information on KEMBLA[®] copper tube.

Yours Sincerely,

Jarvis Fletcher
