

HERME - SEAL NO.88

APPLICATIONS

- It is most suitable to anti corrosive sealing agent for lined steel pipe, such as hard polyvinyl chloride lined steel pipe, powdered polyethylene lined steel pipe. Excellent sealing of the screw portion, as well as heat resistance can be used in wide variety of piping to hot water
 - Suitable of public building construction standard specifications (Ministry of Land, Infrastructure and Transport in Japan)
 - Standardized product of Japan Water Works Association Standard JWVA K146, K142
 - Used for water pipes and lined steel pipes
-

STANDARD SPECIFICATIONS

SKU	EPCM88
Brand	Herme
Color / Type	Grey / Liquid
Characteristic	Drying And Hardening
Viscosity At 25°C	5000mPa.s
Specific Gravity At 25°C	1.4
Nonvolatile Content	68±3%
Temperature Range	-30°C < T <85°C
Water Pressure Resistance	4.9MPa (25A Piping At 25°C)
Self Life	1 Years
Package	500g / Tin With Brush
